CHAUHAN MD SAEEM MD SIDDIK

Bengaluru, Karnataka | +91 6363035701 | saeemchauhan01@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

BCA graduate with a **9.31 CGPA** and hands-on experience in Java, Python, SQL, REST APIs, Power BI, software testing, debugging, and application development. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and DBMS, with experience building and testing end-to-end applications. Familiar with data visualization using Power BI, Excel, Python, and related libraries. Seeking an entry-level SDET role focused on test automation, API testing, SQL, and software quality.

TECHNICAL SKILLS

Programming: Python, Java, C, SQL, JavaScript
Testing & Quality: Software Testing, Test Validation, Debugging, Troubleshooting, Functional Testing Concepts
API & Backend: REST APIs, FastAPI, API Development, API Testing Concepts, PostgreSQL
Data & Visualization: Power BI, Excel, Pandas, NumPy, Matplotlib, Plotly, Scikit-Learn
Tools: Git, GitHub, Docker, Streamlit
CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, DBMS

INTERNSHIP EXPERIENCE

Future Interns — Bengaluru, Karnataka **Mar 2026 – Apr 2026**
Machine Learning Intern

- Developed and tested **3 end-to-end Python applications** involving automated data processing, classification, and predictive workflows.
- Implemented structured preprocessing, validation, model development, and evaluation using **Python, Pandas, NumPy, and Scikit-Learn**.
- Performed iterative debugging and testing to identify issues, troubleshoot technical problems, and improve implementation quality.
- Collaborated with mentors to incorporate feedback and validate application behavior.
- Completed 3 end-to-end data/ML projects and received a Certificate of Completion and Letter of Recommendation.

RELEVANT PROJECTS

Smart Factory Digital Twin
Python · FastAPI · PostgreSQL · WebSockets · Docker · Groq AI

- Engineered a factory monitoring prototype using a Python/FastAPI backend with **PostgreSQL** for structured data storage and **WebSockets** for real-time application communication.
- Tested application workflows during development, validated backend behavior, and used iterative debugging to identify and resolve implementation issues.
- Integrated REST-based backend functionality and containerized the application using **Docker** for reproducible deployment.

Smart System Health Monitor
Python · Streamlit · psutil · Plotly

- Developed a real-time monitoring application to track CPU, memory, and disk utilization.
- Validated monitoring workflows and generated interactive dashboards and automated PDF reports using **Streamlit and Plotly**.
- Deployed the application on Streamlit Cloud and performed iterative testing and debugging during development.

AI Resume Screening System
Python · NLP · Scikit-Learn · Streamlit

- Engineered an automated resume screening system using **TF-IDF, cosine similarity**, and weighted skill matching across 40+ skills.
- Tested classification and ranking workflows and evaluated output consistency across resume inputs.
- Built the application in Streamlit with a structured scoring workflow.

Support Ticket Classification System
Python · NLP · Scikit-Learn

- Developed a multi-class NLP classification system using **Logistic Regression** to automatically route support tickets.
- Evaluated model performance using confusion matrix and precision-recall metrics and debugged implementation issues during development.

EDUCATION

Bachelor of Computer Applications (BCA) **2023 – 2026**
Seshadripuram College, Bengaluru | **CGPA: 9.31 / 10** | Final Semester SGPA: 9.56
Subject Topper: DBMS, Data Analysis & Algorithms (DAA), FEIA & Hindi
Relevant Coursework: Object-Oriented Programming (Java), SQL, DBMS, Data Structures, Data Analysis, Software Engineering

CERTIFICATIONS & JOB SIMULATIONS

- TCS Software Engineering — Forage | AWS Cloud Foundations — Forage | Goldman Sachs Data Visualisation — Forage | Python Essentials — Cisco
- Networking Essentials — Cisco | Power BI | MS Office Tools | Presentation Skills — TCS iON

AWARDS & ACCOMPLISHMENTS

- **Best Tech Team Lead** — Multidisciplinary International Conference, Seshadripuram College, 2026.
- **Four-Subject Topper** — academic excellence throughout BCA.
- **Paper Presenter** — OISCA Global Summit 2025 (Youth), "AI-Powered Solutions for Environmental Restoration".
- **Best Organizer & Team Leader** — Utkarsh Hindi Sangh, 2025.

SOFT SKILLS

Analytical Thinking & Problem Solving · Debugging & Troubleshooting · Team Collaboration & Communication · Technical Documentation · Leadership & Coordination · Adaptability & Time Management | **Languages:** English, Hindi, Kannada, Urdu
